Canadian Data Report of Fisheries and Aquatic Sciences

These reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of Data Reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries management, technology and development, ocean sciences, and aquatic environments relevant to Canada.

Numbers 1-25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26-160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was changed with report number 161.

The correct citation appears above the abstract of each report.

Rapport statistique canadien des sciences halieutiques et aquatiques

Ces rapports servent de base à la compilation des données de classement et d'archives pour lesquelles il y a peu ou point d'analyse. Cette compilation aura d'ordinaire été préparée pour appuyer d'autres publications ou rapports. Les sujets des Rapports statistiques reflètent la vaste gamme des intérêts et politiques du Ministère des Pêches et des Océans, notamment gestion des pêches, techniques et développement, sciences océaniques et environnements aquatiques, au Canada.

Les numéros 1 à 25 de cette série ont été publiés à titre de Records statistiques, Service des pêches et de la mer. Les numéros 26-160 ont été publiés à titre de Rapports statistiques du Service des pêches et de la mer, Ministère des Pêches et de l'Environnement. Le nom de la série a été modifié à partir du numéro 161.

Le titre exact paraît au haut du résumé de chaque rapport.

ABSTRACT

Schubert, N.D. 1983. The Indian food fishery of the Fraser River: catch summary, 1951 to 1982. Can. Data Rept. Fish. Aquat. Sci. 412: v + 357p.

Annual catches of the five species of Pacific salmon and steelhead trout in sixteen catch areas are reported for the period 1951 to 1982. Weekly catches are reported for the period 1968 to 1982, and weekly net effort is reported where available. Management actions applied to the fishery are summarized for the period 1951 to 1982.

Key Words: Fraser River, Indian food fishery, catches, management actions.

Résumé

Schubert, N.D. 1983. The Indian food fishery of the Fraser River: catch summary, 1951 to 1982. Can. Data Rept. Fish. Aquat. Sci. 412: v + 357p.

Les prises annuelles des cinq espèces de saumons du Pacifique et de truite arc-en-ciel dans seize secteurs de pêche sont signalées pour la périod de 1951 à 1982. Les prises hebdomadaires sont indiquées pour la période de 1968 à 1982 et l'effort net hebdomadaire est donné lorsqu'il est connu. Les mesures de gestion appliquées à la pêche sont résumées pour la période s'étendant de 1951 à 1982.

Mots-clés: fleuve Fraser, pêche de subsistance des autochtones, prises, mesures de gestion.

INTRODUCTION

The Indian food fishery of the Fraser River system has been regulated by the Government of Canada since 1888 when an amendment to the British Columbia Fishing Regulations first differentiated between subsistence and commercial fisheries. Departmental personnel did not record estimates of catch until 1922, and it was not until the late 1940's that an annual drainage-wide catch reporting system was established. This report documents catches reported in the Fraser River Indian food fishery during the period 1951 to 1982. Annual catches of Pacific salmon and steelhead trout in sixteen major catch areas are summarized for the above noted period. Estimates of weekly catch, effort and catch per unit effort are reported, where available, for the period 1968 to 1982, and regulatory restrictions imposed on the fishery are summarized for the period 1951 to 1982.

The purpose of this report is to provide, in a single document, the Fraser River Indian food fishery catches for a time series comparable to the commercial catch statistical record. These data will form the basis of a detailed analysis of the fishery which will be published at a future date.

CATCH AREAS

For the purpose of this report, catch areas in the Fraser River Indian food fishery have been delineated by geographical features. Statistical subareas could not be used because the nontidal portion of the Fraser River system has yet to be described in the Pacific Fishery Management Area Regulations. Subdistrict boundaries were not used because they encompass too large an area, and because boundaries have changed a number of times over the period of record.

The major areas and the gear type used are described briefly below. Dominant features which delineate the catch areas are shown in Figure 1. The approximate distance in kilometers from Steveston is bracketed.

1. **Steveston Area (below 9.6 km).** The main arm of the Fraser River downstream from the westerly end of Deas Island, including Canoe Pass, Ladner Reach and Sea Reach; and the North Arm of the Fraser River from Knight Street Bridge downstream to 0.9 km off the west end of the North Arm jetty. Drift nets are the predominant gear used in this area.

2. **Deas Island (9.6 km) to Whonock (61 km).** The main arm of the Fraser River from the westerly end of Deas Island upstream to Whonock; and the North Arm of the Fraser River upstream from the Knight Street Bridge. Set gill nets are the primary gear used in this area, although a supervised drift net fishery also occurs in some years.

3. **Whonock (61 km) to Hope (151 km).** This major catch area is divided into north side and south side sub areas, reported by Mission and Chilliwack subdistricts respectively. Set gill nets are the only gear used in this catch area.

Figure I Study Area Location Map

4. **Hope (151 km) to North Bend (206 km).** This catch area includes a permanently closed area at Hell's Gate extending from a point 6.5 km south of North Bend downstream to Williams Creek, 2.8 km south of Hell's Gate. Set gill nets are the only gear used in this catch area.

5. **North Bend (206 km) to Lytton (254 km).** This catch area was expanded in 1976 to include the section from Lytton upstream to Texas Creek (280 km). Both set gill net and dip nets are used in this catch area.

6. **Lytton (254 km) to Churn Creek (430 km).** See comment above. Both set gill nets and dip nets are used in this catch area.

7. **Churn Creek (430 km) to Chilcotin Bridge (491 km).** The Fraser River mainstem extending from the Churn Creek confluence upstream to the Chilcotin Bridge crossing (also known as the Sheep Creek Bridge), southwest of Williams Lake. Dip nets are the only gear used in this catch area.

8. **Chilcotin Bridge (491 km) to Marquerite (552 km).** Dip nets are the only gear used in this catch area.

9. **Marquerite (552 km) to Hixon (689 km).** Dip nets are the only gear used in this catch area.

10. **Above Hixon (689 km).** This fishery is located primarily in the Fraser River between Hixon and Prince George (768 km). A minor fishery occurs at Shelley(773 km). Set gill nets are the predominant gear used in this catch area.

11. **Nechako River System.** The Nechako system has been divided into six subareas (note: set gill nets are the predominant gear in all areas):

    - Nechako River from Prince George (768 km) to the Stuart River confluence (855 km).
    - Nechako River from Stuart River (855 km) to Fort Fraser (958 km). This subarea includes the fishery at the outlet of the Fraser Lake.
    - Fort Fraser (958 km) to Francois Lake (990 km).
    - Stuart River from the Stuart River mouth (855 km) to the Fort Saint James (967 km). This subarea includes the fishery at the outlet of Stuart Lake.
    - Stuart River system from Fort Saint James (967 km) to Trembleur Lake (1035 km).
    - Above the Trembleur Lake outlet (1035 km).

12. **Chilcotin River System.** The fishery occurs primarily from the Chilcotin River mouth (460 km) upstream to Henry's Crossing (628 km) on the Chilko River. Dip nets are the predominant gear; however, a small gaff fishery exists in the Chilko River.

13. **Thompson River System.** The Thompson River system has been divided into five subareas:

- Main Thompson River from Lytton (254 km) to Savona (368 km). Both set gill nets and dip nets are used in this catch area.
- North Thompson River. This fishery (no longer active) occurred primarily in the North Thompson mainstem above McLure (413 km) and in in Raft River (545 km).
- South Thompson River between Kamloops (408 km) and Chase (467 km). Dip nets, spears and gaffs are used in this catch area.
- Little River (477 km). Gear as above.
- Shuswap River (above 558 km). Gear as above.

14. **Chilliwack River (86 km).** This fishery has not been active since 1967.

15. **Harrison River (102 km to 121 km).** This catch area includes the lower part of the Chehalis River as well as the Harrison mainstem. Both set gill nets and spears are used in this fishery.

16. **Lillooet River System.** The Lillooet System has been divided into two main subareas:

    - Lower Lillooet River, from Harrison Lake (182 km) to Lillooet Lake outlet (240 km). Set gill nets are used in this catch area.
    - Birkenhead River (268 km). This subarea includes a fishery in the upper end of Lillooet Lake. Set gill nets are the primary gear used in this catch area; however, gaffs are also used in the Birkenhead River.

DATA SOURCES

Estimates of catch and effort in the Indian food fishery are compiled on a weekly basis by local fishery officers. Enumeration techniques may include interviews with the fishermen, direct observation, or gear counts (from air, ground or boat patrols) with the estimated catch extrapolated from catch subsamples. The actual technique used at any time in any area is sensitive to both local fishery conditions and to annual variability in subdistrict budgetary and manpower allocations. As a result, enumeration methods often differ between areas and within areas from year to year. A more detailed description of current enumeration techniques will be provided in a future report.

All data in this report have been derived from original sources on file at the district and subdistrict offices of the Department of Fisheries and Oceans. These sources record inseason estimates of weekly catch and effort for most catch areas since 1968. If a complete annual record of weekly catches was unavailable, then annual estimates of catch by species were taken from form F3460, 'Statement of Salmon Taken Under Indian Permit-in pieces'. If neither of the above primary data sources were available, estimates of catch were taken from secondary sources such as the district and subdistrict Annual Narrative Reports (DFO file #5871-BC1); however, primary sources were used when possible in order to avoid potential addition or transcription errors. Previously published Indian food fishery catch statistics (eg. Fraser et al. 1982, IPSFC Annual Report) were carefully scrutinized and any discrepencies were checked to

ensure that the catch statistics reported in this publication accurately reflected those recorded in the original file.

ACKNOWLEDGEMENTS

I wish to thank Sharon Dowling for her able assistance during the early stages of data assembly, and Judy Robertson for typing the manuscript. I am also grateful to the fisheries officers and clerks of Districts 1 and 2 for their assistance in locating the available data sources, and to R. Harrison, R. Humphreys, G. Scott, D. Aurel and W. Elias for reviewing the manuscript. The map was drafted by M. Link.

Appendix 9. Detailed estimates of annual catch (pieces) by catch subarea and species in the Lillooet, Thompson and Nechako River system Indian food fisheries, 1951 to 1982:

page

a) Lillooet River System 48

- chinook
- sockeye
- coho
- chum

b) Thompson River System 52

- chinook
- sockeye
- pink
- coho
- steelhead

c) Nechako River System 57

- chinook
- sockeye

Note: 'NR' indicates no record available.

‡ INCLUDED IN TOTAL FOR "FORT SAINT JAMES TO TREMBLEUR LAKE".

Appendix 10. Weekly mean net counts and catch (pieces) by year, catch area and species in the District 2 Indian food fishery, 1968 to 1982.

Year	page
1982	60
1981	65
1980	71
1979	76
1978	82
1977	87
1976	93
1975	98
1974	104
1973	109
1972	115
1971	120
1970	126
1969	131
1968	137

Note: In some cases, weekly data were available only for part of the year. In those cases, available data are reported (indicated by a footnote) in or der to provide timing of catch information; however, annual data (reported at bottom of each table) are taken from form F3460, Statement of Salmon taken under Indian Permit, rather than summing the column.

1982 DISTRICT 2 CHINOOK CATCHES.

* WEEKLY COUNTS INCOMPLETE.
\# INCLUDES COUNTS FOR HARRISON/CHEHALIS AREA.

Appendix 11. Weekly mean counts, and catch estimates (pieces) by year, catch area and species, in the District 1 Indian food fishery, 1968 to 1982.

Year	page
1982	140
1981	148
1980	158
1979	166
1978	176
1977	184
1976	194
1975	202
1974	214
1973	222
1972	234
1971	242
1970	254
1969	264
1968	276

Note: In some cases, weekly data were available only for part of the year. In those cases, available data are reported (indicated by a footnote) in order to provide timing of catch information; however, annual data (reported at bottom of each table) are taken from form F3460, Statement of Salmon taken under Indian Permit, rather than summing the column.

1982 DISTRICT 1 CHINOOK CATCHES.

Appendix 12. Weekly estimates of catch (pieces) by species and catch per unit effort, by year and catch area (where available), in the Fraser River Indian food fishery for the period 1974 to 1982.

Year	page
1982	288
1981	302
1980	307
1979	312
1978	316
1977	320
1976	324
1975	328
1974	333

Note: Catch per unit effort (CPUE) is based on effort as defined as the product of the average number of nets fishing per day and the number of days open.

1982 SUMMARY OF CATCH BY SPECIES AND CPUE IN THE FRASER RIVER NEAR STEVESTON.
